Please refer to the Mercer University Student Handbook and the Mercer University School of Medicine (MUSM) Student Handbook for the Honor Code, standards of conduct, institutional policies, and resources for students. Master of Science in Biomedical Sciences (MSBMS) students must acknowledge their understanding of the contents of these handbooks as well as the MSBMS Program Manual prior to beginning classes at Mercer. The electronic versions of the documents are available on the following webpages.

Program Description

The Master of Science in Biomedical Sciences (MSBMS) Program at Mercer University School of Medicine is a two-year, research-based graduate program. Students will work closely with research mentors in the Division of Biomedical Sciences on the Macon Campus or in the

Department of Biomedical Sciences on the Savannah Campus. Seventy-five credit hours in biomedical sciences, including both classroom instruction and research comprise the MSBMS Program. The MSBMS Program will prepare graduates for further postgraduate and professional studies in the biomedical sciences, employment in academic research and/or teaching, and research in the pharmaceutical and biotechnology industries.

Following successful completion of a research thesis, students will be awarded the degree of Master of Science in Biomedical Sciences with a concentration in one of the disciplines represented by the Basic Sciences faculty on the Macon and Savannah campuses.

Admissions Information

The current admissions requirements and instructions are available at:

<http://medicine.mercer.edu/admissions/biomed/admissions/>

Academic Information

Attendance

Although it is recognized that absences will sometimes be necessary, students are expected to attend classes. Course Directors will state specific attendance requirements in the syllabi for their courses. It is the responsibility of students to be cognizant of their own record of absences and to consult the Course Directors and instructors regarding work missed. The decision to permit students to make up work rests with the Course Director. Absences will negatively impact grades based on participation during in-class activities, such as group work and laboratory exercises, since this work cannot be performed, as designed, outside of the context of the classroom. The Course Director has the right to assign a grade of 'F' for any attendance and participation portion of the course grade when a student habitually violates the attendance policy specified in the course syllabus.

Communication

Students will receive notifications, instructions, and assignments through their Mercer email accounts and the Canvas learning management system (LMS). Students are responsible for checking their Mercer email daily and immediately reporting problems with access to their Mercer account or to Canvas, unless Mercer Information Technology has previously notified all Mercer users of limited access to these systems. Students are expected to obtain information and to complete assignments posted on Canvas in a timely manner, as instructed by the Program faculty or staff. Problems with Canvas or email access should be reported by email to the Mercer IT Helpdesk at helpdesk@mercer.edu. Course directors and instructors will provide specific details regarding communication expectations for their courses in their course syllabi.

Course Numbering System

The numbering system for graduate courses in the MSBMS is the prefix BMS followed by three digits at the 600 level for core courses and at the 700 level for research courses.

Course Requirements

Students must purchase access to a version (print or electronic) of the textbook for each course. Additionally, the examination process for all courses in the MSPCS Program requires that students have access to a laptop computer. Students are required to provide their own laptop computer as part of the materials required for each course in the Program. The computer must meet the specifications needed to run ExamSoft Exemplify software. The latest minimum system requirements may be found through links available on the Mercer ExamSoft login page. Students should refer to these requirements when considering an operating system upgrade or the purchase of a new computer. Students are required to download and install Exemplify and to install upgrades of the Exemplify software, as they are released by ExamSoft, and to contact ExamSoft support for problems with installing or running the software on their computers. Instructions for Exemplify download and installation will be provided through an email from ExamSoft when student Exemplify accounts are created. Tablets and iPads **cannot** be used for examinations. Mercer ExamSoft Login: <https://ei.ExamSoft.com/GKWeb/login/mercemed>

Curriculum

Year 1

Fall Semester (15 credit hours)

- BMS 610 Biochemistry and Molecular Genetics (5 credit hours)
- BMS 622 Microbial Pathogenesis (5 credit hours)
- BMS 612 Molecular Cell Biology (5 credit hours)

Spring Semester (16 credit hours)

- BMS 620* Human Physiology (5 credit hours)
- BMS 621* Human Development (5 credit hours)
- BMS 611* Human Immunity (5 credit hours)
- BMS 626* Biomolecular Engineering (5 credit hours)
- BMS 711 Research Seminar (1 credit hours)
- BMS 625 Introduction to Research I (10 credit hours)

*Students will choose one of these courses based on their particular research interests; MSBMS Program students completing their thesis research on the MUSM-Savannah campus will take BMS 626.

Summer Semester (12 credit hours)

- BMS 630 Introduction to Research II (11 credit hours)
- BMS 711 Research Seminar (1 credit hour)

Year 2

Fall Semester (16 credit hours)

- BMS 710 Independent Research I (15 credit hours)
- BMS 711 Research Seminar (1 credit hour)

Spring Semester (16 credit hours)

BMS 720 Independent Research II (15 credit hours)

BMS 721 Thesis Preparation (1 credit hour)

Course descriptions can be found on pages 15-18.

Enrollment

Full-time enrollment in the Program is fifteen (15) semester hours of BMS courses in the fall and sixteen (16) semester hours of BMS courses in the spring. No part-time enrollment will be considered. Matriculating students are expected to enroll for the full-time academic load. Full-time enrollment is required for Financial Aid (see *Satisfactory Academic Progress for Financial Aid* on pg. 13). The BMS courses listed below are available only to MS degree-seeking students matriculating in the MSPCS and MS in Biomedical Sciences Programs.

Faculty Evaluations

Students are expected to provide feedback to the School of Medicine regarding their experience in MSBMS courses, including the evaluation of Course Directors and instructors, of textbooks, and of class assignments and activities. Anonymous feedback will be gathered from students in the form of surveys conducted through Canvas after the final examination for each course. Blackboard will record whether a student has completed a survey, but it does not link the student's identity to survey answers. Students who complete the surveys may be able to view course grade information as soon as possible, whereas those not participating in a survey may be required to wait until grades are posted by the Registrar. Student responses to surveys are essential in improving and maintaining the quality of MSBMS education.

Honor Code and Graduate Honor System

Students are to uphold the Mercer University Honor Code and will be held accountable for violations of the Honor Code in accordance with the policies and procedures of the Graduate Honor System. The Honor Code and Graduate Honor System can be found in the MUSM Student Handbook. Honor Code violations (as defined in the MUSM Student Handbook) may result in immediate dismissal from the MSPCS Program.

Online Class Attendance Accommodations

Only students who are directed to isolate by Mercer Medicine following COVID-19 symptoms or testing may attend class online by Zoom. Students are responsible for having reliable internet access that allows them to participate in synchronous, online classes. Expectations for online learning interactions will be provided by faculty as needed. Students should contact the Mercer IT Helpdesk at helpdesk@mercer.edu for assistance with Zoom.

Policies

The Program Director will communicate all policies in the program manual during fall orientation and will notify students about changes in these policies through their Mercer email accounts. Students are expected to adhere to the policies in the program manual and any policy updates.

Registration

All students are required to register for courses at the time prescribed in the MUSM calendar or in compliance with official notices issued by the Office of the Registrar at the School of Medicine. Official course enrollment, which includes the completion of satisfactory arrangement for financial payments, is required for admission to classes. Student registration for courses in the MSBMS Program is completed by the Registrar after a student submits a deposit to secure enrollment. The deposit will be applied to the student's tuition. Registration commits a student to the courses for which he/she is registered and the corresponding fees and charges incurred. A registered student who is unable to attend classes must notify the Registrar of the School of Medicine in writing prior to the first day of class. If a student decides not to attend the Program, the deposit paid by the student to secure enrollment is forfeited. A student who registers after the official registration period is required to pay a \$25.00 late fee.

Transfers

Students may transfer from the MSPCS program to the MSBMS program only after the end of the first semester. Students wishing to transfer must have a GPA of 3.0 and must meet with the Program Director. Student transfers are at the discretion of the Program Director and subject to space availability.

Tuition Scholarship and Stipend

MSBMS Program students in good standing are eligible for an MSBMS Tuition Scholarship for 55 of the 75 credit hours required for completion of the Program. This begins in the second semester (Spring) of the MSBMS Program and covers all credit hours other than the four formal courses taken in the first and second semesters of the Program (Fall Semester: BMS 610, 612, 622; and one course in Spring Semester chosen from among BMS 611, 620, 621, and 626; see Curriculum outline below). MSBMS Students will also be eligible for a Graduate Research Fellowship beginning Spring Semester (January) of the first academic year of the program. This Fellowship comes with a stipend of \$18,000 per year, payable at \$1,500 per month, and continues through May of the second and final academic year of the MSBMS Program. Students are responsible for paying any taxes associated with these stipends.

Academic Standards and Advising

Academic Performance Standards

The academic status of the student is determined by his or her academic performance. A student is in good academic standing as long as his or her examination scores within courses remain at a letter grade of "C" or above, with a minimum cumulative GPA of 3.0. Course directors will report all students with exam scores below "C" on each exam to the Program Director. When a student receives an examination grade of below "C" in a course, he/she must meet with the course director to discuss his/her academic progress and a plan to improve his/her performance in the course. At this point, a student is under 'academic caution'. A second examination score below "C" in the same course requires that the student meet with both the course director and the Program

Director. At this point, a student is under 'academic warning'. Notifications of academic status will be issued to the students by the Program Director. A minimum, cumulative grade point average of 3.0 is required for graduation from the MSBMS Program. *Final course grades below "C" do not count toward the Master of Science in Biomedical Science degree, and any student who receives a grade below a "C" will be dismissed from the MSBMS Program.*

A student seeking the MS degree should complete all Program requirements within the academic calendar of the Program as a full-time student. The maximum amount of time between initial enrollment in the Program and degree requirement completion is three academic years. This maximum time to degree may be needed in the case of a *leave of absence*.

Academic Advising

The Program Director will serve as initial academic advisor for MSBMS students. After the student chooses a thesis research mentor, that faculty member will become the student's primary academic advisor and will direct the student's research along with two other members of the Biomedical Sciences faculty, who will become the student's Advisory Committee. The Advisory Committee, which includes the Research Mentor/Major Professor, will meet with the student regularly to monitor his/her academic progress. The Advisory Committee will report directly to the Program Director. The Advisory Committee will advise the student, monitor his or her progress through the curriculum, and provide academic guidance for the student throughout the MSBMS Program.

Commencement Ceremonies

Only students who have completed all Program requirements in good academic standing by the end of spring semester will be eligible to participate in commencement.

Degree Requirements

Completion of all required course work with a minimum, cumulative GPA of 3.0 and with all final course grades of "C" or above. Both academic performance requirements must be met for successful completion of the degree program. Clearance for graduation must be granted by the Office of the Registrar.

Degree Application

Applications for graduation are processed through the Office of the Registrar in the School of Medicine.

Degree Audit for May Graduation/Commencement

By March of the spring semester, each student in good academic standing must submit an application for graduation to the Office of the Registrar. This application will be available through MyMercer. The degree auditing process is initiated from these applications and is a joint responsibility of the Registrar's Office and the program administration to insure that students stay on track for successful completion of the degree program.

Final Check/Recommendation for May Graduation

The Registrar's Office will check final grade point averages and spring semester final course grades and will clear for graduation those students who meet the degree requirements as defined below. The Registrar's Office will notify students who failed to meet the requirements that they are no longer eligible for the degree and cannot participate in commencement.

Diplomas

Diplomas are not distributed during commencement and will be available only in the Registrar's Office. Diplomas are ordered after all degree requirements are met. Graduates will be notified when their diploma is available.

Repeating Courses

Students who do not achieve a 3.0 final GPA but have a final cumulative GPA of 2.76 or above may file a request to repeat a maximum of two courses for the purpose of improving his/her/their cumulative GPA to 3.0 for degree eligibility (see the paragraph below for instructions). An MSPCS student is eligible to repeat courses only if he/she/they/they has a final cumulative GPA of 2.76 or above, has completed the two-semester program as a full-time student, AND has a GPA of 3.0 or above in one of the two semesters. The MS degree is conferred at the end of the semester in which a cumulative 3.0 GPA is achieved (either December or May). A graduate cannot enroll in additional MSPCS courses after receiving the MS degree. The grade achieved when a course is repeated will replace the previous grade in the cumulative GPA calculation, but both grades received for the course will appear on the student's Mercer transcript.

Students, who meet the criteria described above and wish to repeat courses, must email a request to repeat courses to the MSPCS Program Director within 14 days after the May commencement date for the academic year of his/her/their enrollment. The email must specify the courses and must include a study plan for achieving improved grades in these courses. The Program Director may request a meeting with the student to discuss the plan before approving the request.

Satisfactory Academic Performance

Academic performance will be monitored within courses during each semester for student academic advisement (see *Academic Advising*). For *satisfactory academic performance* in progress toward the degree, a student must maintain a cumulative GPA of 3.0. This is the 'minimum satisfactory academic performance', and a student at this level of performance will be placed on *academic warning* (see definition below).

Satisfactory Academic Progress for Financial Aid

Please refer to the *MUSM Satisfactory Academic Progress for Financial Aid Policy* and the *Financial Aid Maze* for the Program. The maximum time allowed for matriculation to graduation from the MSBMS program is 3 years. Students will be reviewed for their academic progress on a semi-annual basis and will be notified in writing of a change in their financial aid status. A student must maintain a GPA of 3.0 to make Satisfactory Academic Progress for Financial Aid. If a student obtains one "C" for a final course grade in the fall semester, the student will be placed on 'financial aid warning'. If a student obtains two final course grades of "C" in the fall semester, the

student will become 'financial aid ineligible' and must appeal for reinstatement of financial aid eligibility.

Thesis Submission

Each student must prepare and submit a thesis describing his/her research project. The thesis should be formatted according to the guidelines provided on the Office of the Provost [website](#). The deadline to submit theses is July 1. Any thesis that is not submitted by July 1 will be reviewed after the next submission deadline, which is November 1. Degrees will not be awarded until the thesis is approved by the Office of the Provost.

Withdrawal Procedure

To make an official withdrawal from a course, a student must obtain and submit a completed Course Withdrawal Form to the MUSM Registrar. If the student elects to discontinue class attendance and does not complete an official Course Withdrawal Form within the time limits described, a grade of F (failure) will be recorded on the student's official record. The grade of W (withdrawal) indicates that a student officially withdrew from a course on or before the last day for course withdrawals as designated in the current academic calendar. Withdrawals are not used when computing grade point averages. A grade of W may not be awarded if a student does not complete the official Course Withdrawal Form on or before the date designated for each semester in the current academic calendar.

Special Academic Circumstances

Leave of Absence

A student may be granted a Leave of Absence (LOA) for academic reasons. A student on LOA may use the library and other learning resources and will remain on the distribution list for any student updates, class newsletters, and other communications.

Note that these academic LOAs do not meet the conditions of the Title IV regulations for an "approved" leave of absence and therefore must be treated as a withdrawal for Title IV purposes. The withdrawal date is the date the student begins the leave of absence. Students on LOA are not eligible for in-school deferment of student loans.

Student Appeals Process: Grievance Procedures

Students with grievances should follow the procedures for Academic or Nonacademic Grievances, as described in the respective sections of the MUSM Student Handbook.

Special Test Accommodation Policy

Testing accommodations are available for students who provide appropriate documentation of ADD, ADHD, LD or other relevant diagnoses. Providing such documentation is the responsibility of the student. Students seeking test accommodations may initiate the process by approaching the Senior Associate Dean of Student Affairs. Medical evaluation used as the basis of the diagnosis must have been completed within three years prior to the request for accommodation.

All requests for test accommodations are referred to the Senior Associate Dean of Student Affairs who in turn refers the request to the joint Law School/Medical School Test Accommodation Committee for evaluation. This committee is composed of members of the medical school and law school administration and faculty, uniquely approved by their respective Deans as having qualifications to serve in this capacity. Each request for accommodation is handled individually and confidentially. A senior member representing the medical school and the law school jointly chairs the Test Accommodation Committee. The committee reviews test data, other supporting data and evaluator's recommendations. An action plan is recommended to the Dean's representative for approval and implementation.

Student Affairs and Student Wellness

MSBMS students will serve as representatives on the MUSM Student Council, Wellness Program Committee, and Diversity and Inclusion Committee. These groups discuss issues within the MUSM learning environment and plan activities to promote student well-being and to bring together students from all of the degree programs. See the MUSM Student Handbook for more information.

Mercer University School of Medicine
Master of Science in Biomedical Sciences Program

Academic Calendar 2022 - 2023

Fall Semester 2021

Registration	August 19
First Day of Classes	August 22
Last Day for Drop/Add/Late Registration	August 29
Labor Day Holiday	September 5
Last Day for Course Withdrawal/Resignation*	October 26
Thanksgiving Holidays	November 24-25
Finals	Dec 5-9
Last Day of Class	December 9

Spring Semester 2022

First Day of Classes	January 9
MLK, Jr. Holiday	January 16
Last Day for Drop/Add/Late Registration	January 17
Application for Spring/Summer Graduation Due	January 27
Last Day for Course Withdrawal/Resignation*	March 15
Deadline for First Advisory Committee Meeting	March 31
Good Friday Holiday	April 7
Finals	April 24-28
Last Day of the Semester	April 28
Commencement (<i>tentative date</i>)	May 6

*After these dates, tuition is non-refundable. Prior to these dates, tuition is refunded on a prorated basis.

**Mercer University School of Medicine
Master of Science in Biomedical Sciences Program**

Program Schedule

YEAR 1

FALL SEMESTER (1)

August: Three required courses: *Biochemistry and Molecular Genetics, Molecular Cell Biology, and Microbial Pathogenesis.*

September - October: Students meet with MSBMS Research Faculty

November – December: Students choose a research mentor by **DECEMBER 15.**

SPRING SEMESTER (2)

January: Continue classwork: One class from *Human Physiology, Human Development, Human Immunity, or Biomolecular Engineering* (offered in/from Savannah).

Begin thesis research

Choose Advisory Committee in consultation with advisor by **JANUARY 30.**

March: Research Plan is due to Advisory Committee and program Administrative Assistant by **MARCH 15th**. First Advisory Committee Meeting, to include presentation of Research Plan by **MARCH 31.**

SUMMER SEMESTER (3)

May-July: Continue research; consult with Advisory Committee as needed or requested.

YEAR 2

FALL SEMESTER (4)

August: Advisory Committee Meeting: Progress Report (short PowerPoint presentation) to be completed by **AUGUST 31.**

October: Seminar Presentation (approx. 25 min) to DBMS based on progress. Provide title in advance.

SPRING SEMESTER (5)

January: Advisory Committee Meeting in anticipation of completion of thesis research to be completed by **JANUARY 31.**

April: Thesis Presentation to audience including MUSM faculty, staff, and students.

Participation in BEAR Day (Breakthroughs in Engagement, Arts and Research) is required (either a poster or oral presentation is acceptable).

May: Graduation.

July 1: Thesis must be submitted to the Office of the Provost.

Course Descriptions

BMS 610: Biochemistry and Molecular Genetics (5 credit hours)

The goal for the instruction in biochemistry and molecular genetics is for students to understand the chemical and biomolecular composition of the human body, the importance of buffering and solute concentrations in physiological function, the metabolic processes that provide energy to sustain tissue viability, the structure and dynamics of genetic material, the regulation of gene expression, and the principles of genetic inheritance. The learning goal will be achieved by students through problem-solving in the classroom, discussion of medical cases and research literature, and laboratory experiments that illustrate principles in biochemistry and genetics.

BMS 611: Human Immunity (5 credit hours)

The goal for the instruction in the human immune system is for students to understand the development and organization of the human immune system, the genetic and molecular mechanisms of immunity, the role of inflammation in immunity, the initiation and detection of immune responses, and the use of vaccines to support human immunity. The learning goal will be achieved by students through problem-solving in the classroom, discussion of medical cases and research literature, and laboratory experiments that illustrate principles in immunology.

BMS 612: Molecular Cell Biology (5 credit hours)

The goal for the instruction in molecular cellular biology is for students to understand the fundamental structure of human cells, the function of intracellular organelles, the dynamics of organelles in different cell types, the cellular interactions within tissues to support tissue function, and the biomolecular interactions required for cellular function. This learning goal will be achieved by students through problem-solving in the classroom, discussion of medical cases and research literature, and laboratory experiments that illustrate principles in cellular and molecular biology.

BMS 620: Human Physiology (5 credit hours)

The goal for the instruction in human physiology is for students to develop an understanding of the function of the human body, building upon their prior knowledge of human biology, physics, chemistry and mathematics. This course deals with body fluid compartments and body systems organization and function, with special emphasis on the nervous, cardiovascular, respiratory, and urinary systems. Students will examine the concepts of homeostasis and regulatory mechanisms as they are applied in the various body functions. The learning goal will be achieved through a combination of interactive lectures, group discussions, problem-solving exercises, and medical case-based activities. (prerequisites – BMS 610, 622 and 612)

BMS 621: Human Development (5 credit hours)

The goal for the instruction in human development is for students to understand the process of human development, the determinants of embryonic development, the differentiation and organization of cells into functional tissues and organs, the maternal contribution to embryonic and fetal development, the environmental and physiological risks to human development, and the basic functional anatomy of the human body. This learning goal will be achieved by students through classroom discussion, interaction with animated programs depicting developmental

processes, histological analysis of human tissues, and interaction with animated programs and with plastinated models of human anatomy. (prerequisites – BMS 610 and 612)

BMS 622: Microbial Pathogenesis (5 credit hours)

The goal for the instruction in microbial pathogenesis is for students to understand the structural and genetic differences between human cells, bacteria, fungi, parasites and viruses, the variations in structure among members of pathogenic species, the metabolic and genetic properties of microbes that facilitate their adaptation to different environments, the commensal relationship between humans and microbes, the mechanisms of microbial and viral pathogenesis, and the basic laboratory culture conditions and tests for human microbial pathogens. This learning goal will be achieved by students through problem-solving in the classroom and discussion of medical cases and research literature that illustrate clinical application of microbiology principles. (prerequisites – BMS 610, 611 and 612)

BMS 626: Biomolecular Engineering (5 credit hours)

The goal for the instruction in biomolecular engineering is for students to understand the principles and techniques resulting in directed biological alteration at the molecular and cellular scale. This course introduces students to bioengineering methodology spanning advanced recombinant DNA technology and delivery methodology, protein engineering leading to altered structure and function (proteomics), genetic and genomic editing (genomics), bioimaging, biosensing, chip technology, and cell-based assay systems. Students will examine biomolecular engineering concepts as they relate to medical and commercial applications in health care, biomedical, pharmaceutical, biomaterials, and other biotechnology related industries. This learning will be achieved by students through classroom and group discussion of relevant research literature and student presentations that illustrate concepts in biomolecular engineering. This course is offered only on the MUSM-Savannah Campus. Prerequisites: BMS 610 (Biochemistry & Molecular Genetics) and BMS612 (Molecular Cell Biology).

BMS 625: Introduction to Research I (10 credit hours)

Students will be introduced to their thesis research in this class, which will consist primarily of directed study by their individual research mentors as they begin to develop the individual competencies required for their discipline. Students will be evaluated on the basis of their acquired knowledge of these research techniques. Students also will be introduced to the scientific literature, data-handling and analysis (e.g., statistical evaluation of research data), and the responsible conduct of scientific research, including scientific authorship. Participation in this course will be essential for students to develop these core competencies as a scientist. These goals will be complemented by participation in BMS 711: Research Seminar.

BMS 630: Introduction to Research II (11 credit hours)

Prerequisite: BMS 625

Continuation of BMS 625.

BMS 710: Independent Research I (15 credit hours)

Thesis research.

BMS 711: Research Seminar (1 credit hour)

One of the most important skills for a scientist is public speaking. In this course students will participate in research seminar, during which they will attend presentations by MUSM faculty and visiting speakers. This course includes required, regular attendance at the Department of Biomedical Sciences Seminar Program, delivered between the Macon and Savannah campuses by real-time video connection, during which students will become broadly familiar with scientific approaches and projects of MUSM faculty and visiting speakers. Students will also present papers from the classical and current primary literature that supports their thesis research to an audience consisting of MSBMS faculty and their fellow students. The objective of this course is to prepare students to become competent scientific communicators.

BMS 720: Independent Research II (15 credit hours)

Thesis research.

BMS 721: Thesis Preparation (1 credit hour)

Thesis preparation.

Class descriptions and requirements may be modified from time to time based on changing program requirements.

Curriculum revision approved by Graduate Council, effective 13 March 2018.
